Personally, I don't want to spend a fortune on high end cards, regardless of the fact that they provide superb gaming experience.. This happened to me recently, and after installing the latest games, I realized I had to upgrade my VGA card with something faster, but at the same time affordable.. Gaming is something that most users sooner or later get involved with Most of use like to test and play all the latest games available, which often requires hardware updates if we're going to enjoy the game.
